

---

## **Mission**

To provide Countywide disaster management/coordination for the preparedness, response, recovery, and mitigation phases of significant events.

## **Business Strategy**

Emergency Management is responsible for performing technical work in the development, implementation, and management of Countywide disaster preparedness, response, recovery, and mitigation efforts. This includes public awareness and information outreach programs, as well as Countywide training, to assist the community in preparing for local and State emergencies. This division manages emergency operations and also oversees the Hazardous Materials Office, Hazardous Materials Storage Tanks Bureau and Petroleum Clean-up Section.

## **Objectives**

Provide recommendations to Seminole County and its municipalities on the development of disaster management plans.

Coordinate assistance Countywide during the response and recovery phases of disasters.

Provide guidance, coordination and warning to the public regarding natural and technological disasters on a Countywide basis.

Coordinate the evacuation of all or part of the population from any threatened area within Seminole County.

Revise and submit a Comprehensive Emergency Management Plan to the Florida Division of Emergency Management on an annual basis.

Coordinate with federal, state and local governments for assistance during Countywide emergencies.

Develop and review comprehensive emergency management plans for health care facilities.

Provide public information and education.

Revise and submit a five-year strategic plan to the Florida Division of Emergency Management.
